## Information for carers

Caring for a patient  
undergoing day surgery:  
what you need to know

[visionhospitalgroup.com.au](http://visionhospitalgroup.com.au)

# What can you expect at a Vision Hospital Group day surgery?

Vision Hospital Group provides state-of-the-art operating suites and specialist theatre teams in an expertly managed, no-fuss environment.

At our day surgeries, patients receive outstanding, professional care in well-appointed facilities.

We are dedicated to optimising patient outcomes and ensuring patient comfort at all times.

All of our day surgeries are fully accredited against National Safety and Quality Health Services Standards.

## On the day of surgery

**Patients coming for surgery must have a carer (responsible adult) to sign them out and take them home after surgery. The patient cannot take public transport home but may go home in a taxi as long as you are with them.**

If you bring the patient to the day surgery, you will be required to leave and come back – please make sure the reception staff have your mobile number and that you are no further than a 30-minute drive away.

You will be contacted 30 minutes before the patient is ready to be discharged.

Let the reception staff know when you arrive, and take a seat in the waiting room. A recovery nurse will assist you to sign the patient out.

# What happens after the surgery?

There may be special care required after surgery such as medication, eye drops, or things that should and shouldn't be done. Please follow the instructions carefully, as this will ensure the best possible outcome for the patient.

If there are any issues when you get home, please contact the surgeon at their consulting rooms as they are the best person to assist you with any enquiries regarding post-operative care.

Patients who have had sedation can be unsteady on their feet and you will need to provide extra help or support while walking.

They will also need assistance for tasks such as:

- going up and down stairs
- getting in/out of the car
- stepping up gutters
- going to the toilet.

It is recommended that you stay with the patient overnight. Patients are not allowed to drive, operate machinery, consume alcohol or sign any legal documents for 24 hours following their surgery. If the patient has young children, please arrange for someone else to look after them.

# Frequently asked questions

## Does the patient need to take their usual medications on the day of surgery?

Unless their doctor has advised otherwise, the patient should take their usual medications with a small sip of water.

## What does the patient need to bring with them on the day of surgery?

The patient needs to bring their Medicare card, pension card and/or health fund information and any payment required.

They should not bring any valuables, or should leave them with you prior to surgery.

## How long will the patient be in the day surgery for?

This will depend on the procedure and the patient's recovery. Most patients can expect to stay between 2 and 4 hours in total.
